Academic:

- Bachelor's degree in Computer Science from Universidade Federal de Itajubá (Federal University of Itajubá), UNIFEI (2015-2018).
- **Course Final Paper:** Optimization of Hyperparameters in Deep Neural Networks.

Academic Experience:

- **Scientific Initiation Scholarship** from Conselho Nacional de Desenvolvimento Científico e Tecnológico - CNPQ, for two years (2015-2016/2016-2017)
- **Member of the Student Academic Center** (Academic Directory of Computing, DACOMP) as Graduation Director of the Computer Science course.
- **Teaching Assistant in the disciplines**: Data Structures, Object Oriented Computing and Web Development.

Professional Experience:

- Software Developer Internship by the company Tuuris.com, using the following technologies: Ruby On Rails, GraphQL, VueJs, Mysql, Docker and TDD (2017–2018).

- **Currently working** as a **Full Stack developer** at MOONTECH System Technology, working mainly with: Groovy/Grails, AngularJs, Ionic and Firebase.

Volunteer Work:

- Volunteer in CATS-Curso Assistencial Theodomiro Santiago, as an administrative assistant in the IT department (2014 - Philanthropic Institution).

Languages:

- **English:** Comprehends Well, Speaks Little, Reads Well, Writes Little.

Interesses:

I have an academic/professional interest in Artificial Intelligence, Operational Research, development of Object Oriented Programming and methods that assist in decision making through Discrete Event Simulation.

Achievements:
- I have always strived in my academic activities. I am among the 4.14% better of the means of completion of my course.
- I was in the first place in the classification of scholarships of Scientific Initiation - PIBIC made by UNIFEI in 2015..
- I published two papers at conferences and symposiums and a patent for Computer Program.
